West River Pharmacy: USP 797 Renovations by Cleanetics in Response to License Revocation

Cleanetics specializes in new construction and retrofits of USP 797 compliant compounding facilities. In as little as 3 weeks, Cleanetics turned a non-complaint sterile compounding pharmacy into a state-of-the-art fully-compliant facility.

Services provided to West River Pharma included:

- Construction Feasibility Analysis (with Site-Visit)
- USP 797 Consultation & Gap Analysis
- Design & Engineering Plan
- Construction Build-out Schedule
- Full-time Project Management
- Certification
- Customer Training
- Annual Preventive Maintenance (Optional)

Considering the recent outbreak of meningitis being attributed to deficient sterile compounding practices, we advise all of our clients to take the necessary steps to ensure that their production facilities are in compliance with the federal mandate.

Operating within a Cleanetics environment will be your Company's first step in preserving the public's safety, lessening the risk of contamination of the end product and reducing your long-term liabilities.
